

CLOUD PBX

***Enterprise-grade Phone System for SMBs
Lower costs. Reliable communication.***

With our Cloud PBX, you get all the features your business needs for incoming, outgoing, long distance and conference calls. No more phone lines. No more chargeable minutes. It's all inclusive! Your enterprise-grade phone system provides uninterrupted communication, better flexibility and reduced costs.

MEET OUR CLOUD PBX SOLUTION

Traditional phone systems can be a costly investment – from expensive hardware to long distance fees to limited phone lines. Cloud PBX solves all these problems.

BENEFITS

Reduce phone service costs

Put an end to costly hardware, bill shock, long distance fees and long-term contracts. You'll get predictable billing and reduce costs by 50-75%.

No more busy signals

You'll never miss an important call. A lot of features are available in call queues that help to create customized experiences for your callers, including your personal phone menu (IVR), call forwarding and voice mail.

Worry-free

We guarantee 99.999% uptime reliability for your calls. That means you won't have to worry about interruptions or unexpected downtime. Your Cloud PBX will automatically re-route calls during a potential disaster.

Be more productive

Work smarter and faster with desktop/mobile applications and 40+ features, including follow-me/call forwarding and unlimited calls.

Meet your growing needs

Business taking off? Congrats! Easily manage users, devices & locations to meet your growing needs. Adding phone numbers and extensions is easy.

Number porting

Use your existing phone number or get a brand new one. All you have to do is plug in your phones. No delays. It's that easy!

Work from anywhere

Get greater mobility and freedom. Your PBX system is BYOD-friendly, so your team can connect from any device, from any location.
